

Diabetes Friendly

Classes, Activities and Trainers

Version 1 – March 2026

Information is correct at the time of printing. It is recommended that you make direct contact with the contact given for the latest details.

Challenge Diabetes – Move Happy

The Challenge Diabetes Move Happy campaign from Active Canterbury is designed to encourage people with pre or type 2 diabetes to embrace regular physical activity for them and their whanau as part of the management of their condition.

Pre-diabetes and type 2 diabetes are growing concerns for the health of our community and movement is an important and simple way to help manage these conditions. This is why the Active Canterbury Network has chosen to focus specifically on these conditions and create this directory of Diabetes Friendly classes, activities and trainers.

To be listed on this directory the leader, instructor or trainer must have completed an upskilling workshop on Diabetes and Exercise, either via an in-person workshop or online.

The power of exercise in a class or group

This directory aims to encourage people with pre-diabetes or type 2 diabetes to find appropriate classes or groups to increase their movement.

Group leaders will ensure participants are working at an appropriate level and provide modifications as necessary. The camaraderie and socialisation aspect that is inherent in a group situation cannot be underestimated as a powerful element in providing overall well-being. In short, motivation, accountability and social support is all provided through group exercise.

Forging connections in your area

It is our hope that the compilation of this directory will enable people who work within the diabetic community to seek out the exercise providers who have upskilled around diabetes and exercise and forge relationships to better serve our common goal of supporting Cantabrians become more active more often.

Updating the directory over the coming months

The directory will be regularly updated as more diabetes friendly classes, activities and trainers come on board. Initially only a few will be listed but we hope this will grow in number over time.

Nurse Maude Community Diabetes Team

The Nurse Maude Community Diabetes Team supports those with type 2 Diabetes in Canterbury through:

- Consultations to help manage and review treatment plans.
- Education sessions to help build knowledge and confidence – including if you are newly diagnosed.
- Dietitian assessments and tailored nutrition advice.

Ask your GP or practice nurse for a referral to the Nurse Maude Community Diabetes Service.
